THE PROBLEM WE SOLVE

- 70%** — Curricula lack interdisciplinary integration (Hong, 2025)
- 65%** — Students feel unprepared for practical application (Hult/NACE, 2025)
- 45%** — Limited exposure to system-level thinking (AAC&U, 2023)
- 80%** — Employers see skills gap in project readiness (Ibec/McKinsey, 2022)
- 30%** — Programs integrating community/environmental metrics (Leifler & Dahlin, 2020)
- 90%** — Infrastructure projects facing delays from knowledge gaps (Flyvbjerg, 2014)

The Reality Engine exists to close this gap — from age 8 to thesis level.

THE HUMAN BLIP — WHY THIS MATTERS

0.000267%

$$S = (A \times P) / \beta$$

The Survival Formula — the civilisational equivalent of $E = mc^2$

375,000×

FRAGILITY MULTIPLIER — every 1% error amplified

99.9997%

REQUIRED THRESHOLD — margin of error

THE 2,229 SECONDS

Each Person's Cosmic Counterweight

2.58% of a day = 2,229 seconds

*Population growth does not make survival harder —
it makes the individual burden lighter.*

THE TARGET — 1 BILLION LEARNERS

1,000,000,000

= 12.1% of Humanity = THE TIPPING POINT

THE SCIENCE

Spider Network Model

1,093 connected nodes → geometric acceleration

Like a phase transition in physics — once critical mass is reached, the change is irreversible

CURRENT STATUS (live data)
