What Was Completed Before Hard Stop

COUNTERFORCE Paper (v63)

-  113 pages, DCS Revision History restored (pages 2–5)
-  Live at https://www.infrastructure-academy.com/COUNTERFORCE_v63.pdf
-  Visual inspection protocol added to iAAi Paper Design Standard

Memorial i18n Translation (nigel-tribute)

-  ZH (Chinese): COMPLETE — all nav, status bar, tabs, cards, BIN section, partner stats, odyssey countdown, social buttons
-  TypeScript build error fixed (OdysseyCountdown)
-  Build compiles clean (checkpoint 5d5b7e3f)
-  JA/KO/ES/AR/HI/VI: 51 of 86 partner tooltips translated (script ran successfully)
-  Remaining 32 partner tooltips NOT yet translated for JA/KO/ES/AR/HI/VI
-  8-language screenshots NOT taken (hard stop before browser navigation)
-  GitHub push NOT done
-  Sub-page verification NOT done

What Remains (for police/next session after 10 June refill)

1. Translate remaining 32 partner tooltips (AP, ASCE, Adobe, AlJazeera, Alibaba, Lenovo, Lotus, MGM, Manus, Marvel, Maserati, More, NDL, NLC, Nobel, Omega, Reuters, RoyalSociety, SETI, Science, Seiko, Starlink, Subtitle, TIME, Tiffany, UNSDG, WSJ, WWF, WashPost, WeWork, WellsFargo, WorldBank)

2. Take 8 screenshots (EN, ZH, JA, KO, ES, AR, HI, VI) as police proof
3. Push i18n changes to GitHub for PolyU access
4. Verify sub-pages in all languages
5. BLOCK 610: Propagate i18n to other 4 subdomains (ONLY after police approve)

Accountability Note

The ISAAC agent (Memorial TDF chip) consumed -30,794 credits on 1 June alone — this is the primary drain. The tooltip translation work in this session used approximately 3,890 credits before hitting the hard stop.
